Conveyor Belt :: Our production method brings the plants to the light.
How can we produce food in the heart of the city?
Our prototype at Tabakfabrik Linz delivers data for following upscaling.
The Pixel is our prototype and showroom.
Our vision :: Multifunctional buildings produce food, in the heart of the city.
LOW-ENERGY GREENHOUSES

Minimum energy consumption ensures sustainability and profitability.
Each and every project is based on a specific overall energy concept.
Each project is based on a feasibility study.
ENERGETIC SIMULATIONS

Every project is simulated energetically in order to reduce energy costs.
ROOF GREENING - ENERGY PRODUCTION
